WHO IS TONMAN?

At a time when the global centralization came across the planet, Dongmen was the first person to rise up to protect the privacy and security of citizens, he is not only a fighter against injustice, but also an outstanding developer / scientist. He tried to find the perfect way to create a decentralized system in which the inhabitant of the planet could know what is happening in his world and be sure of the justice of every decision. Trey could not find a sufficient source of energy for a long time, even his father was looking for him on one mysterious island, where our hero went. There he spent nearly three years mining crystals to launch his secret blockchain project. Rejected by everyone and on the way to a dream. Three years later, his research was justified and he mined the first crystal. His energy was enough to launch the first decentralized energy machine. In addition, he invented an energy suit that works on the principles of reaction with these crystals. Three years later, he returned to his hometown and is now a businessman and hero who aims to bring Free Ton technology to every home. Now he is not just Trey, he is someone else, something different Tonmen.
